

**EDITORIAL (Issue 2 Volume 1)**

Dear readers,

This is great honor for me to address respectable subscribers and readers of esteemed Life Science Journal of Pakistan (LSJP). You know that we have already published first issue, wherein six valuable manuscripts were included. The first manuscript was related to biomedical profile changes of CKD patients during and after hemodialysis. It is considered an important topic for the Clinicians to understand profile changes to maintain patient health undergoing dialysis. The second manuscript was on nutritional profile of school children for understanding such serious concerns by the Policymakers. The third manuscript was on dextran production under the emerging field of Biotechnology. In the first issue we also included two review articles on important aspects such as Rabies Virus and others on Nutritional Importance of Dry Fruits.

In order to continue addressing emerging trends in Life Sciences, we have accepted five manuscripts on important areas of research. First is, correlation of bla<sub>NDM</sub> to antibiotic resistance, second is regarding isolation and characterization of antimicrobial agents from *Moringa* spp, third on In-Silico Analysis of Grapevine Germin like Protein form Pakistan. We have also included two review articles pertaining to type-2 diabetes and applications and perspectives of chitosan.

Finally, I would like to congratulate all our honorable members of LSJP who have contributed to the successful launching of first issue and working hard for likewise publication of second issue well in time. I am confident that such beautiful team efforts will lead to achieving several milestones for its successful publication in future too and bring name of our beloved country Pakistan.

**Prof. Dr. Mushtaq A. Saleem**  
Editor In Chief
